

DRAKE MINING AND MANUFACTURING

The following is a conversion guide that details the revisions necessary to make the *Mercenary Breed: Drake Mining and Manufacturing* supplement compatible with SWADE. Changes are highlighted in red.

XENO TEMPLATE

- **Dehydration:** Golgesh require submersion in water to avoid dehydration. Every golgesh character must submerge themselves in water for at least 30 minutes every day or gain one level of Fatigue. This Fatigue only goes away once the character submerges himself for 30 minutes per level of Fatigue.
- **Language:** Golgesh are fluent in Argosian along with their native language Golsh.
- **Swimmers:** Golgesh are excellent swimmers and accustomed to fighting under the water. **Gain a +4 bonus to Athletics when swimming, ignore penalties for fighting while underwater, and have a swimming Pace equal to their Athletics die.**
- **Underwater Heritage:** Golgesh have evolved from an underwater species to one that can live below and above water. They are able to breathe underwater and can never drown.
